

M DEEPIKA

Full Stack Developer | AI Prompt Engineer | MERN Stack Developer | Web Developer

Location: Ramanathapuram, Tamil Nadu, India
Phone: +91 9789719885
Nationality: Indian
Email: deepika84284@gmail.com

LinkedIn: [linkedin.com/in/m-deepika-6aa17a325](https://www.linkedin.com/in/m-deepika-6aa17a325)
GitHub: github.com/deepika84284-ship-it
Portfolio: deepz-one.vercel.app

PROFILE

Final-year CSE student and Full Stack Developer with hands-on experience building REST APIs and full-stack web applications. Skilled in MERN Stack, SQL, AI-assisted development, Prompt Engineering, and modern web technologies. Strong understanding of database management, authentication, API development, AI tools, and problem solving.

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, State Management

Backend & Databases: Node.js, Express.js, MongoDB & Mongoose, SQL, MongoDB Atlas, RESTful API Design, JWT Authentication, CRUD Operations

Core Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Computer Networks, Database Management Systems (DBMS), Problem Solving

AI & Prompt Engineering: Prompt Engineering, ChatGPT, Google Gemini, Claude, Grok, GitHub Copilot, Cursor, CodeRabbit, Snyk, DeepSource, Reviewpad, Perplexity, NotebookLM, Zapier, Gamma, Otter.ai, AI-Assisted Development, LLM Workflows

Tools, DevOps & Cloud: Git & GitHub, Postman, Docker, Jenkins, Vite, Netlify, Render, Railway, Vercel, Azure

KEY PROJECTS

Expense Tracker API — Backend & Database

DecodeLabs Internship

Tech: Node.js, Express.js, MongoDB | GitHub: github.com/deepika84284-ship-it/expense-tracker-api

- Developed a RESTful API with 5+ endpoints covering complete CRUD operations, implementing proper HTTP status codes.
- Integrated MongoDB Atlas using Mongoose for schema design and persistent data storage.

Agri-AI System — Smart Agriculture with AI

Personal Project

Tech: React, TypeScript, Vite | Live Demo: agri.techtigers.in | GitHub: github.com/deepika84284-ship-it/agri-ai-system

- Built and deployed a smart agriculture web application using AI-driven logic to support farmers in making informed decisions.
- Designed 10+ reusable, modern UI components with React and TypeScript.

SafeCart — E-Commerce Fraud Detection & Safety Platform

Personal Project

Tech: React.js, Node.js, Express.js, MongoDB | GitHub: github.com/deepika84284-ship-it/safecart

- Developed a full-stack platform to help users identify and avoid online scams using modern web technologies and AI-assisted development.
- Implemented authentication, role-based access, CRUD operations, and threat/risk analysis; integrated an AI Copilot feature for scam guidance.
- Used ChatGPT and Google Gemini as AI-assisted development tools for debugging, code improvement, and workflow optimization.

Luna — Privacy-First Local AI Desktop Assistant

Luna Hackathon

Tech: Electron, React, Node.js, Express.js, Ollama (Qwen2.5 7B)

- Built a desktop AI assistant using Electron with a React frontend and Express.js backend, integrating Qwen2.5 7B as a local LLM.
- Designed AI interaction workflows and prompts for task-based assistance, focused on privacy by processing all AI tasks locally.

EXPERIENCE

Full Stack Development Intern | DecodeLabs

Jun 2026 – Jul 2026

- Completed a virtual full-stack development internship, translating theoretical concepts into production-ready solutions.
- Built and delivered backend REST APIs with 5+ endpoints, reducing manual data-handling effort through structured error handling.

Web Development Intern | SyntexHub

Dec 2025 – Jan 2026 & Jun 2026 – Jul 2026

- Completed two web development internships at SyntexHub, building and deploying 5+ production-ready responsive pages using HTML, CSS, JavaScript, and React JS; used Git version control in an agile workflow.

Full Stack Developer Intern | Zazu Technologies, Coimbatore

01 Aug 2026 – 30 Aug 2026

- Developed full-stack web applications using React.js, Node.js, Express.js, and MongoDB, integrating REST APIs and CRUD operations.
- Gained hands-on experience with SQL, database concepts, authentication, debugging, and responsive web development.

EDUCATION

B.E. – Computer Science Engineering

Expected Jun 2027

Mohamed Sathak Engineering College, Kilakarai (Affiliated to Anna University) | CGPA: **8.24 / 10**

CERTIFICATIONS

- Programming Foundations — LinkedIn Learning, 2024
- Web Development Internship — SyntexHub
- NetBeans Certification — Score 96%, IIT Bombay
- Full Stack Development Internship — DecodeLabs
- Full Stack Developer Internship — Zazu Technologies

ACHIEVEMENTS

- Winner — Project/Product Expo, Mohamed Sathak Engineering College (2023).
- Regional Finalist — EDII-TN Innovation Hackathon 2024.
- MSEC Alumni Meet 2026 Pitch Finalist — Frontend Specialist for ArogyaNext.
- Winner — Tata Crucible Campus Quiz 2025, Level 1.

LANGUAGES

Tamil, English
